FICTIONAL SAMPLE SOP — created for the EvidenceLoop demo. Not a real procedure.

SOP CF-12: Ceiling fan replacement

Applies to ceiling fans in teaching laboratories, including Lab 3.

Specified unit: Aerivo CF-52 (52 in, 230 V). Smaller models such as the CF-48 are not approved for laboratories.

Procedure

1. Isolate the circuit and remove the existing fan.
2. Install the Aerivo CF-52 on the existing ceiling box in Lab 3.
3. Fix the canopy bracket to the ceiling box with both fixings.
4. Connect line, neutral and earth at the terminal block and close the canopy.
5. Restore the supply and run the fan at every speed setting; record a short video.

Evidence to record

- Before photo of the existing fan with the LAB 3 sign visible.
- After photo with the model label on the motor housing visible.
- Close-up of canopy fixings, wiring and label.
- Video of the fan running at each speed.

This procedure supports verification. It does not replace qualified inspection or certification.
